Summary

AI/automation-focused solutions architect with 6 years of experience designing and deploying production machine learning systems and workflow automation platforms. Strong background in cloud infrastructure, LLM application design, and cross-functional delivery for enterprise clients.

Experience

Senior AI Engineer — Northwind Data Systems (2022–Present)

- Designed and shipped a multi-agent LLM pipeline (LangChain, Python) automating client onboarding, reducing manual processing time by 40%.
- Led migration of batch ML inference workloads to AWS (SageMaker, Lambda, Step Functions), cutting infra cost by 25%.
- Built internal n8n-based automation platform integrating Slack, Gmail, and Google Workspace for HR and Sales teams.

ML Engineer — Alderbrook Analytics (2019–2022)

- Developed NLP classification models for support-ticket triage, deployed via REST APIs serving 50k+ requests/day.
- Implemented CI/CD pipelines (Terraform, GitHub Actions) for ML model deployment.

Skills

Python, LangChain, AWS (SageMaker, Lambda, Step Functions), Terraform, n8n, LLM application design, REST APIs, SQL, Docker, CI/CD, stakeholder communication.

Education

M.S. Computer Science — University of Texas at Austin (2019)

B.S. Computer Science — Texas A&M University (2017)
